

Sub B3
A2
11. (Amended) A light-emitting apparatus comprising:
a primary light source including a semiconductor light-emitting device with an emission wavelength of from 420 nm to 490 nm;
a secondary light source including a fluorescent material composed of at least one member selected from the group consisting of ZnS:Eu, YVO₄:Ce and Y₂O₂S:Ce; and
a third light source including a second fluorescent material configured to absorb the light of said primary light source, the third light source being configured to emit red light, wherein said secondary light source emits light based on light given from said primary light source so that light of said secondary light source and the light of said primary light source are mixed together to thereby generate light different in luminescent color from the light emitted from said primary light source.

Sub B6
A3
21. (Amended) A light-emitting apparatus comprising:
a first light source including a semiconductor light-emitting device configured to emit blue light;
a second light source including a first fluorescent material configured to absorb light of said primary light source and to emit green light; and
a third light source comprising a red color LED configured to emit red light; wherein the light of said first light source, light of said second light source and light of said third light source are mixed together to thereby generate white light.

22. (Amended) A light-emitting apparatus according to claim 21, wherein said first fluorescent material is composed of at least one member selected from the group consisting of ZnS:Cu, Au, AL; ZnS:Cu; ZnS:Mn; ZnS:Eu; YVO₄:Ce; Y₂O₂S:Eu and Y₂O₂S:Ce.

Please see the attached Appendix for the changes made to effect the above claims.

Please add the following new claims 35-37 as follows:

Sub 87
--~~35.~~ (New) A light-emitting apparatus according to claim 11, wherein said first fluorescent material is composed of at least one member selected from the group consisting of ZnS:Cu; Au, Al; ZnS:Cu; ZnS:Mn; ZnS:Eu; YVO₄:Eu; YVO₄:Ce; Y₂O₂S:Eu and Y₂O₂S:Ce.

36. (New) A light-emitting apparatus according to claim 11, wherein said second fluorescent material is composed of CaS:Eu.

Sub 87
37. (New) A light-emitting apparatus according to claim 11, wherein said third light source includes a semiconductor light-emitting device configured to emit red light.--
